SOVEREIGN INDUSTRIAL AI WORKBENCH (MRPL PS 26117)

CERTIFICATE OF AIR-GAP SOVEREIGNTY & MATHEMATICAL INTEGRITY

This official certificate of compliance is conferred to certify that the AI execution workflow for Problem Statement MRPL PS 26117 was executed strictly on-premise within dedicated sovereign hardware. Zero external WAN packets were transmitted, mathematically ensuring 100% data confidentiality for sensitive refinery P&ID schematics, financials, and boiler inspection records. All mechanical engineering calculations were executed in an AST-hardened Python sandbox and cryptographically sealed via an immutable SHA-256 Merkle DAG.
